

PAG POWER SUPPLY

Professional Broadcast Camera Power Supply

This compact and lightweight Power Supply connects directly to the battery mount on the back of the camera. No cables are required except for the standard IEC power cable supplied with the unit.

The PAG Power Supply is capable of providing a full 50W, suitable for powering most broadcast cameras.

Two models are available: one is compatible with the PAGlok Connector, and the other is compatible with the Anton-Bauer/Snap-on camera mount.

The PAG Power Supply has a universal mains input of 90-270V, and features a power 'ON' indicator.

The unit complies with all CE Directives for EMC and Safety and the output is fully protected.

Specifications

PAGlok Power Supply:
Model No. 9791

PAG Power Supply
(Anton-Bauer/Snap-on compatible version):
Model No. 9798

Input Supply:

90-139V or 140-270V ~ auto-selected.
Frequency 47-63Hz.
Maximum power consumption 75W.

Output:

13V DC, 50W nominal.

Safety:

Designed to comply with electrical safety standards EN60335-1 and EN60335-2-29 Class 1 (safety earthed).

Dimensions:

160 x 105 x 42mm (excluding PAGlok claws).

Weight:

600g.

Operating Temperature Range:

0°C to +40°C
(+32°F to +104°F).
