> PAG has introduced V-Mount and PAGlok Battery Mounts for the Sony PMW-EX3 XDCAM HD EX Camcorder.

> These lightweight, easy to fit battery mounts enable you to power the camcorder using PAG's new L95e batteries. The L95e is available in V-Mount and PAGlok formats and provides up to 6.5 hours run-time for the EX3.

> The V-Mount battery connector (9522/84V) features a D-Tap output for 12V camera accessories, while the PAGlok version (9522/84) incorporates a PP90 output (2.1mm). Both are ideal for powering the Paglight M 12V mini-camera light, available with D-Tap or PP90 power bases.
