that you demand the best

PAG Power Plate

Dual battery mount for PAGlok or V-Mount L95 batteries

Combine the Power of Your Batteries

The PAG Power Plate is a dual battery mount that enables two PAG L95, L95e or ZL-50 batteries (PAGlok or V-Mount) to be used in parallel, providing a combined capacity, and a higher current-draw capability.

Camera Compatibility

The PAG Power Plate is available with a choice of connectors, suitable for cameras fitted with the three most popular mounting systems: PAGlok, V-Mount, and Anton-Bauer.

Shoot All Day

The combined capacity is ideal for powering a camcorder and camera light simultaneously for extended periods.

Share the Load

Combining the capacities of two 95 watt-hour Li-Ion batteries has advantages over using one higher capacity battery. Sharing the load between the batteries ensures that you do not discharge a

single battery at an excessive rate. Li-Ion batteries that have capacities greater than 100 watt-hours are restricted to 2 units per person, by civil aviation and air transport authorities, when transported

by air in hand luggage. The 95 watt-hour L95 and L95e are exempt from these restrictions. PAG's Li-Ion batteries are also independently tested in accordance with United Nations regulations and certified 'Air Safe'.

190 Watt-Hours

The combined output of two L95s is 190 watt-hours, almost three times the power of a Ni-Cd SuperPack of equivalent voltage.

Perfect Balance

The combined weight of the Power Plate and two L95s is 1.87kg, less than a 14.4V Ni-Cd SuperPack, and an ideal counterbalance for the weight of the lens.

Monitor the Charge Status of the Batteries

The Power Plate incorporates a PAG Power Circle display, a built-in charge-status indicator that relates to the voltage output of the batteries connected.

Power Output for Camera Lighting

Power Plate Models 9553 and 9553V, suitable for use with cameras fitted with the Sony V-Mount, incorporate a PP90 output socket that enables you to power a Paglight with a high-wattage lamp.

Battery Compatibility:

The PAG Power Plate designed for **PAGlok** batteries can be used with the following models:

PAG L95	Models 9382 & 9335
PAG L95e	Model 9310
PAG ZL-50	Model 9315

The PAG Power Plate designed for **V-Mount** compatible batteries can be used with the following models:

PAG L95	Models 9360 & 9335V
PAG L95e	Model 9310V
PAG ZL-50	Model 9315V

Specifications

Power Plates for PAGlok Batteries:

For camera fitted with PAGlok Connector

Size: 215 x 132 x 39mm
(8.5" x 5.2" x 1.5")

Weight: 386g (0.85lb)

Model 9551

For camera fitted with the Snap-on mount

Size: 215 x 132 x 40mm
(8.5" x 5.2" x 1.6")

Weight: 406g (0.89lb)

Model 9552

For camera fitted with Sony V-Mount

Size: 215 x 132 x 55mm
(8.5" x 5.2" x 2.1")

Weight: 423g (0.93lb)

Model 9553

Power Plates for V-Mount Batteries:

For camera fitted with PAGlok Connector

Size: 215 x 136 x 44mm
(8.5" x 5.4" x 1.7")

Weight: 390g (0.85lb)

Model 9551V

For camera fitted with the Snap-on mount

Size: 215 x 136 x 45mm
(8.5" x 5.4" x 1.8")

Weight: 410g (0.90lb)

Model 9552V

For camera fitted with Sony V-Mount

Size: 215 x 136 x 60mm
(8.5" x 5.4" x 2.4")

Weight: 427g (0.94lb)

Model 9553V
