EX 1.5X Tele Converter (72mm)

16x9 Inc. introduces the EX 1.5X, an HD-quality Tele Converter designed to enhance the performance of popular compact HD camcorders. The 1.5X simply threads onto the front of the camera lens, adding 1.5X magnification, moving the focal range in the telephoto direction.

Extreme Telephoto, Instantly & Simply

The original camera lens focal length 4.5 to 90mm shifts to 42 to 135mm, or the equivalent of a 35mm still lens with a range of 304.5 to 975mm.

Compact Comando

This lightweight (595g) and compact (68mm long) production tool mounts to the front of the lens via a 72mm screw-in thread. For professional shading solutions, the unit comes complete with a lightweight, round hood. The EX 1.5X lens front is threaded to accept either the complimentary hood, 86mm glass filters, or a combination of filter with the hood front mounted, for even greater light control.

Innovative, Technically Advanced Design

The 16x9 Inc. EX Collection is engineered and built in Japan for optimum optical performance. The 1.5X features an innovative, technically advanced design employing an elegant assembly of five multi-coated elements. Low dispersion glass reduces chromatic aberrations and provides professional images with exceptional crispness and clarity.

Mattebox Compatible

For professional shading and filtering solutions, the EX Tele-Extender neatly interfaces with Alfred Chrosziel HDV mattebox systems.

Suitable for the following cameras:

- » Canon XH-A1/G1
- » Canon XL-H1
- » Canon XL-2
- » Panasonic DVX-100B
- » Sony V1U/FX7 requires 72:62mm step-down ring (INCLUDED)
- » Sony Z1U/FX1

Features:

- » HD Quality
- » Five Multi-coated Glass Elements
- » Low Dispersion Glass Reduces Chromatic Aberrations
- » Chrosziel Mattebox/Sunshade Compatible
