

“I love small lights
and Paglight is the
best example I
have ever seen”

Jack Cardiff OBE BSC DOP

Jack Cardiff with director John Huston

Paglight

Jack Cardiff is a cinema legend. He has worked on over 100 films. In 2001 he became the only cinematographer to be awarded an honorary Oscar.

As a lighting cameraman Jack Cardiff became renowned for his dramatic use of lighting and coloured effects which made his films some of the most beautiful in cinema history. He won an Oscar for his work on *Black Narcissus* in 1947. Other Oscar nominations followed for *War and Peace*, *Fanny*, and for directing *Sons and Lovers*.

Today, even at 92 years old, Jack is still working in film production. He recently used the Paglight at the National Museum of Photography, Film and Television, in Bradford, and said of it “*I love small lights and Paglight is the best example I have ever seen.*”

Paglight is the world’s best camera light. Its patented plug-in lampholder feature enables it to be converted from halogen to arc. It is cool-running and gives a soft even spectral distribution. **In honour of Jack Cardiff, and in consultation with the great man, PAG has created a limited edition, two-headed lighting kit, that it calls the *Jack Cardiff Pro-Shooters Paglight Kit* (see Page 21 for details).**
