

PAG Low-Cost Chargers.

Low-Cost Chargers for Low-Cost Batteries

The PAG Freelancer and PAG V2 are ultra-compact, multi-chemistry low-cost chargers. They are designed to complement PAG's low-cost L95e batteries, also available in PAGlok and V-Mount models.

> The PAG Freelancer will charge Ni-Cd, Ni-MH and Li-Ion batteries in the ranges 12 to 14.8V, 1.5 to 10Ah.

> The PAG V2 will charge Li-Ion and Ni-MH batteries made by PAG and Sony.

Compact & Lightweight

The chargers feature a tough but lightweight moulded construction ideal for location use. Each model is slightly larger than a PAG L95 battery and will fit easily into your camera bag.

PAGlok, V-Mount and NP1

Two full-sized battery connectors are incorporated: PAGlok for the Freelancer and V-Mount for the V2. The Freelancer can be used to charge NP1 batteries via PAG NP1 Charge Adaptor Model 9574.

Li-Ion Recovery

Both chargers incorporate a program for the recovery of Li-Ion batteries, when the output has been shut down by the internal protection circuit.

Maximum Capacity

After full-charge, the Freelancer may apply a balancing charge, and a maintenance charge to Ni-Cd or Ni-MH batteries, to keep them at their peak capacity.

Status Display

Comprehensive LED indication of battery and charger status is a common feature. The chargers are fully automatic in operation and constantly monitor every process.

Worldwide Operation

Both chargers can be powered from any AC mains supply worldwide, or from a vehicle battery with the PAG DC/DC Converter Model 9774, (see Page 16).

PAG Chargers.

PAGlok

PAG CUBE Model 9702

4 x PAGlok connectors only
Intelligent Parallel Charging:
PAG Li-Ion (latest 3-pin models)

Sequential: Ni-MH & Ni-Cd:
4.8V to 14.8V, 1Ah to 10Ah

PAGlok

PAG AR124PLD Model 9792

4 x PAGlok connectors
4 x PP90 sockets
PAG Li-Ion
Ni-Cd & Ni-MH: 4.8V to 14.8V, 1Ah to 10Ah
Discharger

PAGlok

PAG QUASAR Model 9752

2 x PAGlok connectors
2 x PP90 sockets
PAG Li-Ion
Ni-Cd & Ni-MH: 4.8V to 14.8V, 1Ah to 10Ah
Camera Power Supply

PAGlok

PAG QUASAR Model 9726

2 x PAGlok connectors
2 x PP90 sockets
PAG Li-Ion
Ni-Cd & Ni-MH: 4.8V to 14.8V, 1Ah to 10Ah

PAGlok

PAG Freelancer Model 9613

2 x PAGlok connectors only
PAG Li-Ion
Ni-Cd & Ni-MH: 12V to 14.8V, 1.5Ah to 10Ah

PAGlok

PAGlok CPA Model 9701

Camera Power Adaptor
For use with PAGlok Cube Charger
Outputs 16.8V at 5.5A
Requires Model 9450 XLR-4 male to female connector.
