

USB Output Unit

For V-Mount PowerHub

Model 9709U

The USB output unit for the V-Mount PowerHub Model 9709 is situated at the base of the Hub. It can be used to power any 5V device that draws up to 2A continuously,

3A peak; or it can be used to charge your phone. It also incorporates voltage output protection.

To replace the USB output unit for the V-Mount PowerHub, first remove the lower left and right output units either side of it, and then lift out the USB unit. Position the new USB unit in the same port and then re-insert the output units either side of it.

Guarantee

Notwithstanding any provision of any agreement the following guarantee is exclusive: PAG Limited guarantees each USB Output Unit it manufactures to be free of defects in material and workmanship under use and service for **2 YEARS** from the date of purchase. This guarantee extends only to the original purchaser. This guarantee shall not apply to fuses or any product or parts which have been subject to misuse, neglect, accident or abnormal conditions of operation.

In the event of failure of a product covered by this guarantee, PAG Limited will repair and calibrate equipment returned to an authorised Service Facility within the period of the guarantee, provided the guarantor's examination discloses to its satisfaction the product was defective. The guarantor may, at its option, replace the product in lieu of repair. With regard to any equipment returned within this period, said repairs or replacements will be made without charge. If the failure has been caused by misuse, neglect, accident or abnormal conditions of operation, repairs will be billed at a nominal cost. In such a case, an estimate will be submitted before work is started, if requested.

Servicing & Repair

If the PAG PowerHub USB Output Unit becomes damaged or a fault develops, seek advice from your nearest Authorised PAG Service Centre:
