

PAGlink™

BATTERY READER

★ Manage batteries more efficiently, ensure equal use and prolong overall life.

★ Display useful data stored in the battery's microprocessor.

★ Track the number of charge/discharge cycles.

★ For use with V-Mount Li-Ion batteries: PAGlink PL96 & PL150, PAG L96 and Sony Professional Info.

DISPLAY BATTERY DATA AND MANAGE BATTERIES MORE EFFICIENTLY

The PAGlink V-Mount Battery Reader is designed for use with PAG intelligent batteries. It enables you to access data stored by the battery's microprocessor.

The Reader is a compact and lightweight tool that you slide onto the contacts of the battery to display data. It features an easy-to-understand, alphanumeric display. The first menu item is the battery state-of-charge, shown as a percentage. The up and down buttons can then be used to access the other categories. The menu item is displayed first, followed by the reading for the battery.

With knowledge about the number of charge/discharge cycles each battery has performed you can ensure that all your batteries are used equally. This is good practice because when Li-Ion batteries are not used it can shorten their life.

Cell temperature data can be used to avoid charging or discharging if the battery is too hot or too cold.

Software version will tell you which program the battery is running. Updating software to the latest version enables you to benefit from PAG's continually developing technology.

When applied to linked batteries the Reader will display the combined capacity.

A single press of the button on the right moves selection onto the next category; the left button moves it back to the previous category. The menu categories are displayed in the following order:

Percentage State of Charge:

Available Capacity in Ampere-Hours:

Cell Temperature:

Number of Charge/Discharge Cycles:

Voltage (Potential Difference):

Full Capacity in Ampere-Hours:

Date of Birth (Month/Year):

Software Version:

SPECIFICATION

Model No. 9647

Compatible V-Mount Li-Ion Batteries:

- PAGlink PL96 (Models 9303 & 9304)
- PAGlink PL150 (Models 9308 & 9309)
- PAG L96 (Models 9310V & 9305V)
- Sony Professional Info Batteries

Dimensions (H x W x D):

77 x 52 x 28mm (3" x 2" x 1.1").

Weight:

50g (1.7oz).
